

Amendments to the Specification

Please amend the paragraph beginning at page 14, line 2 as follows:

Q' The image-sensing image processing section 2 includes an image sensing device 27 formed of a CCD or the like, an A/D converter 28 for converting a subject image (analog signal) photographed to image data which is a digital signal, a timing pulse generating circuit 29 for generating a pulse signal for driving the image sensing device 27, a liquid crystal monitor 30 for displaying a photographed image, an image display circuit 31 for driving the liquid crystal monitor 30, a DRAM 32 used for temporarily storing image data and processing and modifying the image data, a communication interface circuit 34 for making communication with an external control device 33, image data recording media 35 for recording image data, and an image data controller 36 containing a DSP for performing the modification or the like of photographed image data and control of the constituents such as the image sensing device 27 according to an instruction of the ~~CPU 1~~ CPU 4.

Appln. No. 09/578,466
Amdt. dated March 23, 2004
Reply to Office Action of December 24, 2003

Amendments to the Drawings:

Submitted herewith are annotated sheets showing changes to Figs. 1 and 2 to obviate the objection set forth in the Office Action.
